

MySQL® Database Wizard

MySQL Databases allow you to store lots of information in an easy to access manner. The databases themselves are not easily read by humans. MySQL databases are required by many web applications including some bulletin boards, content management systems, and others. To use a database, you'll need to create it. Only MySQL Users (different than mail or other users) that have privileges to access a database can read from or write to that database.

Step 1: Create A Database

New Database:

rrios419\_

example

Note: 54 characters max.

MySQL® Database Wizard

You have successfully created a MySQL user named "rrios419\_final".

Step 3: Add user to the database.

User: **rrios419\_final**  
Database: **rrios419\_example**

☒ ALL PRIVILEGES

<input checked="" type="checkbox"/> ALTER	<input checked="" type="checkbox"/> ALTER ROUTINE
